

The Administrative Information Management System (AIMS)

MyConnection Job Postings and Employee Contact Information Available

The Administrative Information Management System (AIMS) has now begun posting jobs, as the restriction period has ended. There will be a steady posting of positions over the next several days.

In addition to Job Postings there are numerous Human Resource features now available, including Employee Contact Information. It is important that all employees log in to MyConnection to check that their information has transferred correctly and that it is updated to the most recent information.

We look forward to introducing more AIMS features, with Finance functionality being introduced on November 1, 2022, Supply Chain on November 7, 2022 and Reporting on November 16, 2022.
